

► The new Machinery Regulation is coming

PILZ
THE SPIRIT OF SAFETY

Take advantage of the lead time and get prepared

▶ You have questions.
We have answers!

Changes are coming – new specifications in Machinery Safety require that you perform process adjustments as the machine manufacturer and operator. What is needed now is the ability to act. Pilz will guide you during the transition from the Machinery Directive to the Machinery Regulation (MR). With updated Pilz training and services. Always with a finger on the market's pulse!

What is changing, what is important
and what must now be done!
www.pilz.com/mr

▶ Our expertise for your success

From normative and legal requirements to training and practice-oriented services through to product solutions:

- ▶ Pilz provides comprehensive support for the efficient integration of machinery protection and work safety into your processes as the machine manufacturer or operator.
- ▶ We will guide you through the changes and the adaptation of your processes from the Machinery Directive to the Machinery Regulation!

Standards and legal requirements

Know-how on the interpretation and application of normative and legal requirements for Machinery Safety.

Training

Learning about Machinery Safety and Industrial Security as well as training courses for the application of product solutions.

Services

Risk assessment, safety concept, implementation of measures as well as validation/verification of your machinery.

Product solutions

Safety products such as sensors, relays or controllers as well as automation solutions to make your machinery safe.

Safe, secure and compliant machine(s)

The ultimate goal in machinery safety is a safe, secure and compliant machine so that both humans and the machine itself are protected from each other in the best possible way.

Training – because knowledge is protection

Machinery Regulation made simple! Using training to learn about Machinery Safety.

You wish to be proactive and learn more about legal and normative requirements as well as the implementation of Machinery Safety and compliance? Our training ideally equips you for this! Select the suitable training, scan the QR code and sign up directly.

The perfect training to prepare you for the MR:

Introduction to Machinery Regulation

Fundamentals of Industrial Security

Fundamentals of Machinery Safety

Basis of CE Marking

Updated in line with the new MR

Need even more knowledge?

Become an expert – multi-day courses with TÜV certification: ¹⁾

CMSE – Certified Machinery Safety Expert

CECE – Certified Expert in CE Marking

CECE – Recertification

CEFS – Certified Expert in Functional Safety

Updated in line with the new MR

Our services – let's tackle this together!

CE marking required? Process changes?

No problem: Pilz will take care of all the steps for you, from risk assessment through to validation, in line with normative and legal requirements and most recently also according to the requirements of the new Machinery Regulation.

We naturally also support you during process changes so that your projects can be planned in line with the new specifications at an early stage. To keep you on the safe side.

New challenges?

New possibilities! Preparation pays off!

Pilz supports you in the conversion of your processes:

In the engineering field, for example, you receive data and information relevant for Industrial Security if desired as part of the project documentation to prepare for an Industrial Security risk assessment, in order to have your machinery examined for vulnerabilities. So that you are always one step ahead.

Our special recommendation:

Ideally suited for preparation for the MR!

CESA – Certified Expert for Security in Automation

Are you looking for special expertise on industry-oriented applications and specific product training?

Find the perfect training for you here.
